Software Engineer

SUMMARY

Software engineer with 9 years of experience building and modernizing enterprise full-stack and backend systems across government, financial, and advertising domains.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS

Frameworks: Spring Suite, .NET / .NET Core, Angular, Hibernate, Entity Framework, Bootstrap

Cloud & Infrastructure: AWS, Terraform, BigQuery, Docker / Dev Containers

Data & Messaging: SQL Server, Oracle, Cassandra, Kafka, JMS, MSMQ

Practices & Tooling: REST APIs, Test-Driven Development, CI/CD (Jenkins, TeamCity), Agile/Scrum, Git, GitLab, Jira, Confluence

EXPERIENCE

Engineering Enablement Developer(Contract) — Prime Therapeutics *Eagan, MN | 2025 – Present*

- Led proof-of-concepts and authored the technical standards for migrating legacy Java and .NET applications from bare metal to AWS, partnering with platform, security, and CI/CD teams to define cloud-ready architectures and deployment best practices.
- Established the company's first .NET Core reference implementation, defining the modern patterns and practices for .NET application migrations to AWS.
- Designed reusable prompt-engineering patterns that turn AI-assisted development into testable, repeatable workflows, accelerating local prototyping for cloud-ready applications.

Full-Stack Developer(Contract) — FedEx *Ann Arbor, MI | Feb 2024 – 2025*

- Built Enhancements for unified single service provider that merged FedEx Ground and Express operations into one pickup-and-delivery pipeline using Java, Angular, and Cassandra. A consolidation projected to save the company approximately \$4 billion.
- Enhanced functionality and associate experience across the Line Haul Planning Tool's microservices using Spring Boot, Oracle, JMS, and Angular.

Full-Stack Developer(Contract) — Ally Financial (SmartAuction) *Detroit, MI | 2022 – 2023*

- Built and maintained backend systems on a Java Spring Boot microservices architecture that powered curated, world-class vehicle inventories for the platform's top client.
- Partnered with front-end and UI/UX developers to deliver features, resolve defects, and ship enhancements across the Angular Frontend.
- Safeguarded code quality and security by writing Mockito test coverage to standards enforced through SonarQube and Checkmarx.
- Mentored junior developers through pair-programming sessions, code review, and ongoing technical feedback.

Software Developer — Valassis *Livonia, MI | 2017 – 2022*

- Built and maintained the metadata-integrity layer of an enterprise Asset Management System using Java, Spring REST, Spring MVC, Hibernate, and SQL Server, ensuring image file data stayed accurate and consistent across the platform.
- Restructured and modernized several legacy VB desktop applications into maintainable C# .NET web applications.
- Created, maintained, and enhanced the Team Portal web application in C# MVC, giving the support team streamlined access to services and abstracted SQL Server queries.
- Guided fellow developers on architecture and framework decisions, including microservices implementations built on MSMQ.

EDUCATION & CERTIFICATIONS

AWS Certified Developer – Associate *In Progress*

CompTIA Security + *Jul 2025*

Grand Circus Java Bootcamp *2017*
